# Find and fix your leaks

Repair leaks to reduce water waste and risk to your business

With more than 3 billion litres of water lost through leakage every day and the change in climate we're experiencing in the UK, it's vital that we do all we can to save water.

Leaks are one of the biggest causes of high water use, with Smart Meter data indicating that as much as 25% of business water consumption might be leakage. Not only is this wasting significant amounts of water, but it costs businesses thousands of pounds every year, as they can often go unnoticed and lead to issues such as burst pipes.

To help save water, businesses like yours can complete a [Leak and Flow Test](#) to determine if you've any leaks on your premises. If the test shows there's a leak somewhere along your supply, we can support with our Leakage Find and Fix service.

We'll visit your premises and use specialist equipment to find the leak. Once found, we'll give recommendations on how it can be repaired as quickly as possible with minimal disruption to your business activities.

If your water usage or bill is higher than usual and you're not sure why, there might be a hidden leak somewhere along your supply.

Lower your bills as you pay for the water you use

Reduce water wastage

Option to receive a leakage allowance (specific criteria applies)

Reduce the risk of further issues like burst pipes

If you're unsure how to complete the test, or discover a leak and would like a quote for our Leakage Find and Fix service, please email [leakagefindandfix@wave-utilities.co.uk](mailto:leakagefindandfix@wave-utilities.co.uk) or call 01733 830 728.
